

Terra-Sorb[®] 4 macro radicular

Root Fertiliser made of Amino Acids
obtained by Enzymatic Hydrolysis

Terra-Sorb® 4 macro radicular

Guaranteed Analysis

Free Amino Acids.....	4%	Soluble Phosphorous (P ₂ O ₅).....	1%
Total Amino Acids.....	6%	Soluble Potassium (K ₂ O).....	2%
Total Nitrogen (N).....	3%		

Application

Free Amino Acids of **Terra-Sorb® 4 macro radicular** penetrate inside roots increasing plant metabolism and photosynthesis activity. Free Amino Acids also contribute to root development and enhance nutrient uptake and transportation from roots. **Terra-Sorb® 4 macro radicular** is applied through the water irrigation systems (drip irrigation, sprinkling,...) and can be mixed with commonly used fertilisers once they have been diluted in water. It can also be used in nutritional solutions to stimulate a greater nutrient uptake by plant roots. It is recommended to apply **Terra-Sorb® 4 macro radicular** whenever the crop needs a nutritional and physiological stimulation, such as:

- At transplantation
- At shoot growth at the beginning of the crop cycle.
- At pre-flowering and at petal drop.
- During fruit growth.

It is also recommended to apply **Terra-Sorb® 4 macro radicular** whenever the crop is suffering from stress situations such as drought, cold, heat, salinity, asphyxia, etc... and as a recovery treatment after critical periods such as frost, hail, wind, etc...

Crops and Dosage

Terra-Sorb® 4 macro radicular can be applied to all kinds of crops: Vegetables, Fruit trees, Citrus, Tropical crops, Olive trees, Grapes, Potato, Sugar Beet, Tobacco, Cotton, Maize, Alfalfa, Ornamentals, etc...

Apply **Terra-Sorb® 4 macro radicular** through the irrigation systems at 10-20 lt/Ha every 7-15 days at the recommended moments.

Compatibility

Terra-Sorb® 4 macro radicular is normally compatible with most commonly used pesticides and fertilisers. Avoid highly alkaline mixtures. In cases of unknown compatibility it is better to do a prior test before application.

Notice for users

The recommendations and information provided are the result of extensive studies and tests carried out under strict conditions. However, a number of factors beyond our control (preparation of mixtures, application, weather conditions, etc.) may intervene in the use of this product. The company guarantees its composition, formulation and content. The user shall be liable for any damages caused (lack of effectiveness, general toxicity, waste, etc.) due to total or partial failure to follow the instructions on this label. Store in the original container and protect from extreme humidity and temperatures.
